

Proposed Section 368 Energy Corridors

Detailed Map Series

Introduction

This Federal Land and Resource Management Plans to Be Amended State Base Map Series depicts the Proposed Section 368 Energy Corridors, and the boundaries of the plans which would be amended to designate them across each of the eleven Western states. The Proposed Section 368 Energy Corridors are represented with a centerline which is not to scale.

The boundaries for some BLM plans depicted in these maps may not be current. During the development of this PEIS and supporting maps, a number of BLM land use plans were undergoing revisions for reasons unrelated to corridor designation, and those revisions may have resulted in changes in plan boundaries. Some of those plan revisions were only recently completed but not in time for boundary changes to be incorporated into the Part 5 Map Atlas maps of the final PEIS. Subject to the limitations indicated above, the specific plans that could be amended with corridor designation are presented in Appendix A of the PEIS.

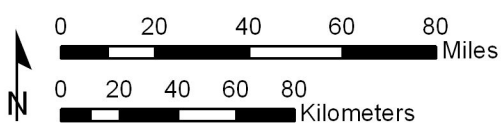

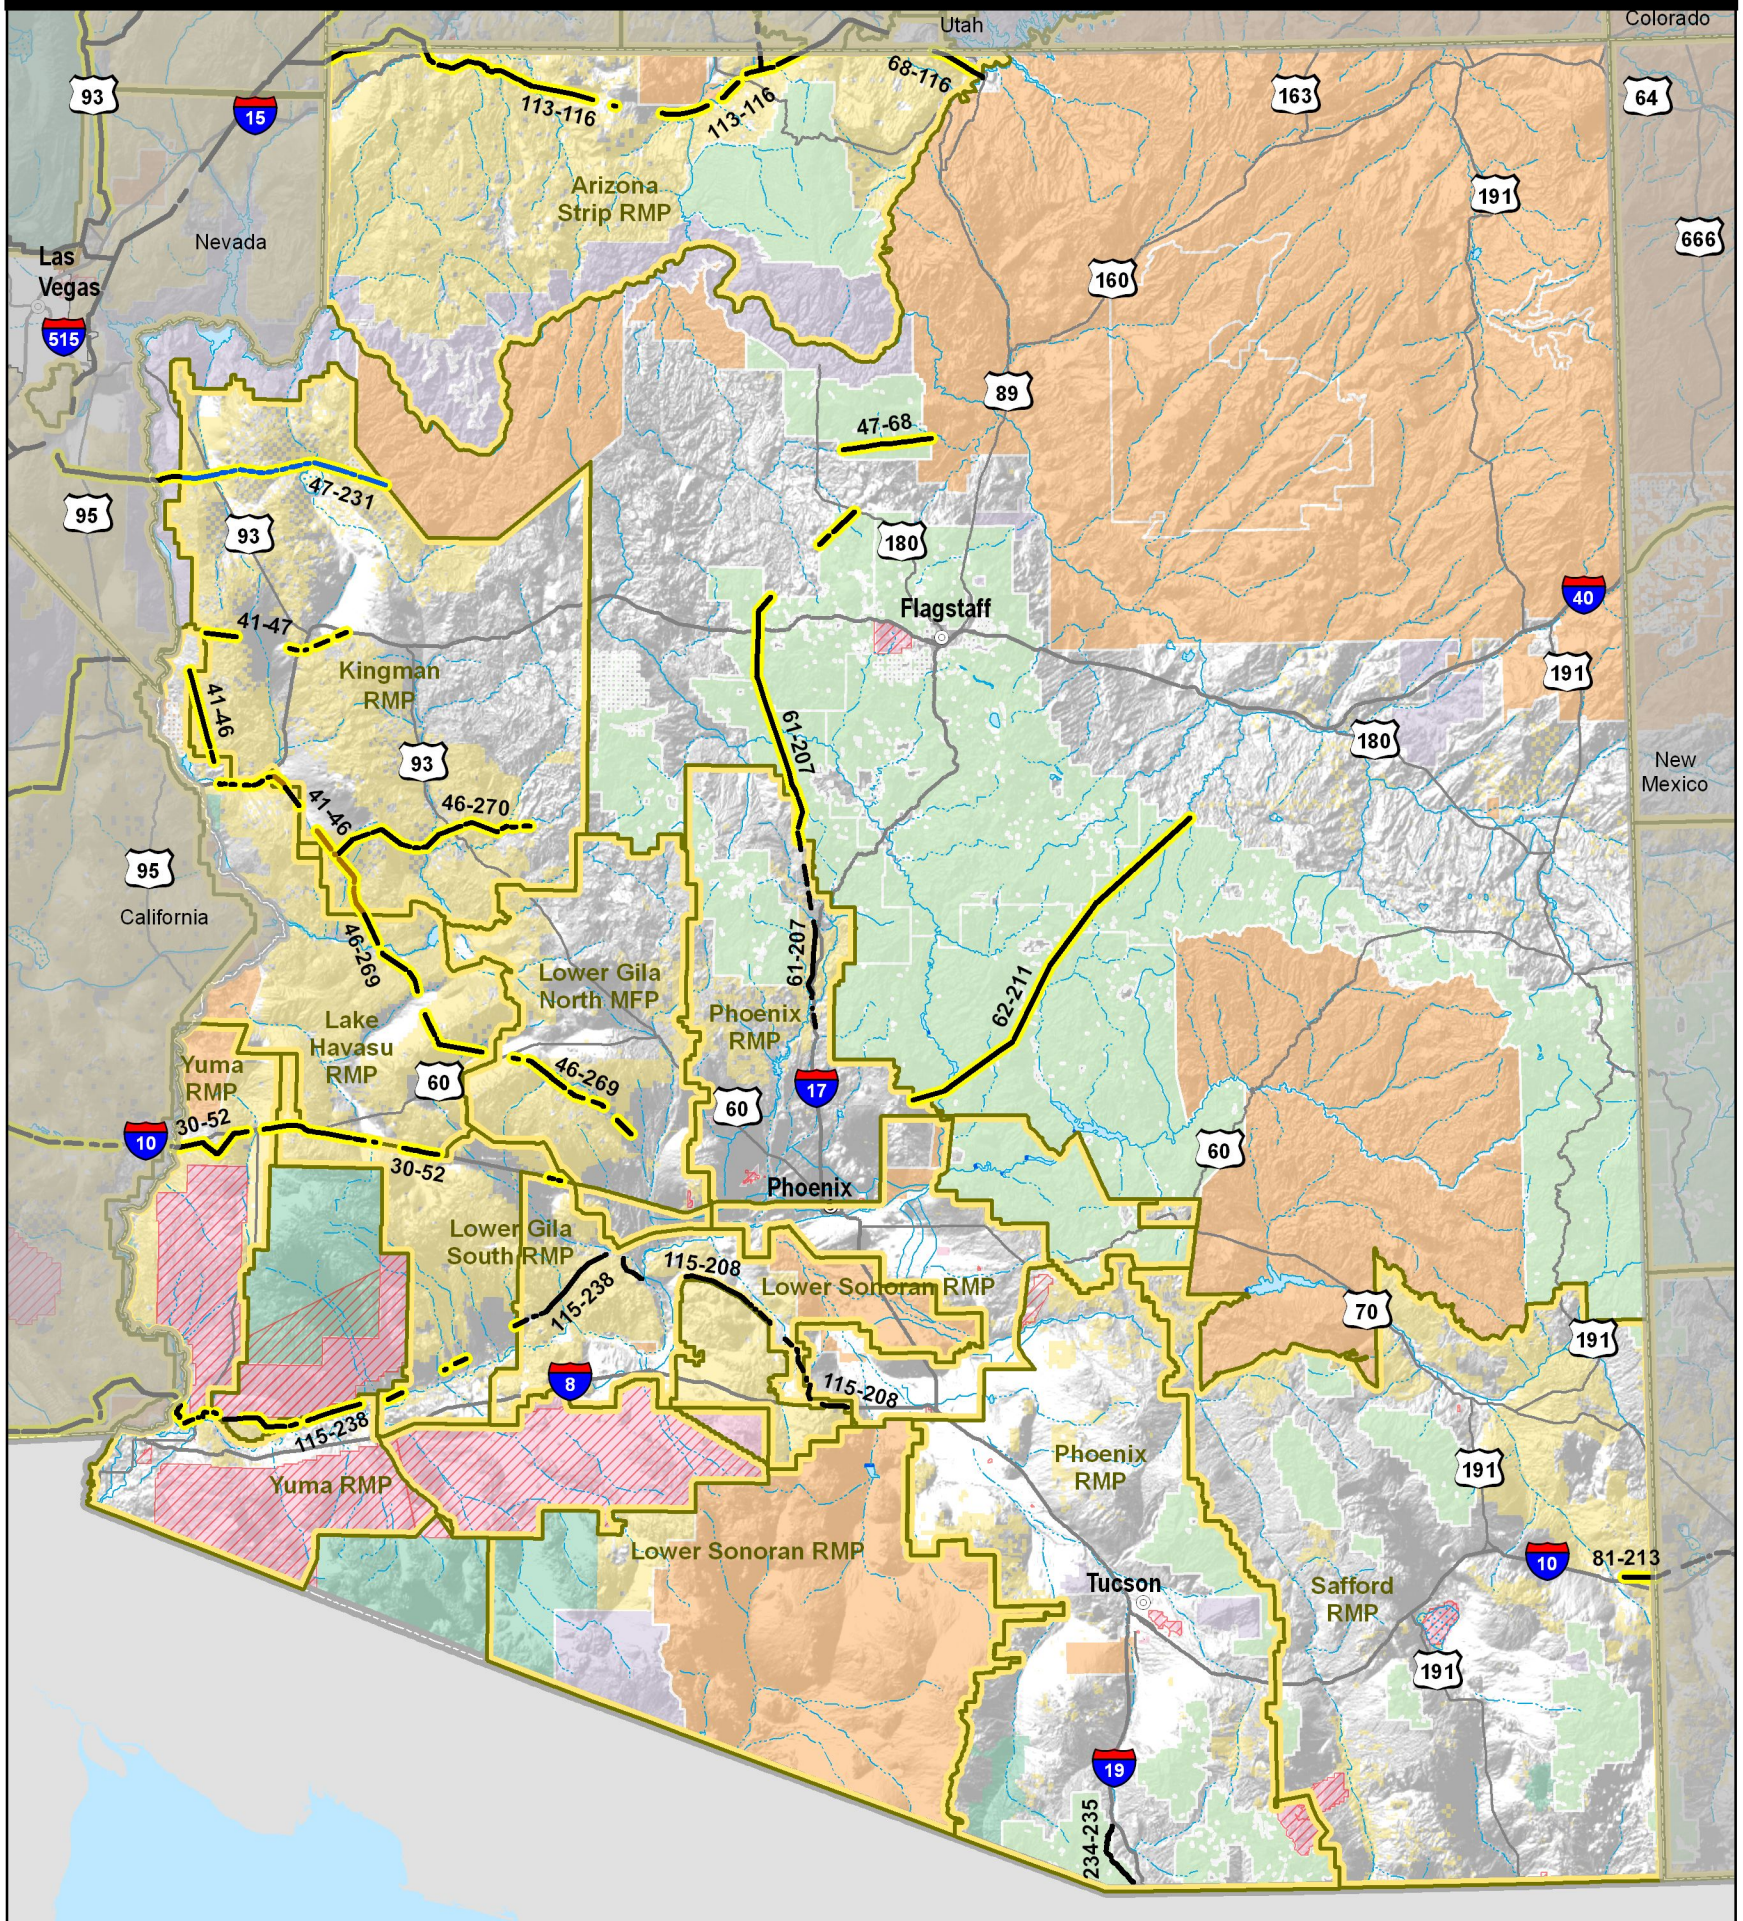

Please refer to Part 1: Large Scale Base Map Series for maps with greater detail.

Using the Detailed Maps

Each State is presented in the following pages alphabetically, with two pages per state. The first of the two shows BLM plan boundaries, and the second shows other agency plan boundaries.
