PUBLIC MEETING FOR

PROGRAMMATIC ENVIRONMENTAL IMPACT STATEMENT,

SALT LAKE CITY, UTAH

-00000-

: REPORTER'S TRANSCRIPT

HELD BY: MEETING DATE:

: October 26, 2005

MEETING TIME: 2:00 p.m.

Bureau of Land Management U.S. Department of Energy

U.S. Forest Service

MODERATOR:

Scott Powers, BLM

-00000-

1 So in sum, Williams supports the concept. 2 We look forward to working with you as we go through 3 this to learn more about what it means. But keep in mind these corridors should not be exclusive corridors 4 and people need to be able to build outside of them as 14:34:34 5 6 well. Thank you. 7 MR. POWERS: Thank you. I just wanted to add two quick points. The we didn't talk about some 8 9 specific requirements of the act itself, but we are required to consider and identify the width of the 14:34:52 10 corridor and the compatible uses that would be allowed 11 12 within that corridor. So that's some of the kind of 13 information we're looking to getting through scoping. 14 Next person is Kris Hohenshelt with Kern UT03 15 14:35:12 River Gas. 16 MR. HOHENSHELT: Good afternoon. My name is 17 Kris Hohenshelt. I am the Manager of Land & Environment for Kern River Gas Transmission Company. Kern River Gas 18 19 Transmission Company owns and operates 1,679 miles of 14:35:39 20 interstate natural gas pipelines through the states of Wyoming, Utah, Nevada, and California. Approximately 21 22 850 miles are located on federally managed lands. 23 River transports a design capacity of 1.7 billion cubic 24 feet of natural gas per day. 14:35:56 25 Kern River appreciates the opportunity to

participate in this important endeavor being undertaken as mandated in the Energy Policy Act. The study, hopefully resulting in the establishments of better defined and expanded energy corridors, is critical to

Impact Statement should assess corridors with traditional multiple use principles -- corridors that will accommodate not only electric use transmission lines, but pipelines and other energy infrastructures as well, adding to the statement of Mr. Draper. Corridors should also be established to accommodate not only multiple uses, but also multiple numbers of facilities.

Some energy corridors have been established through land use planning documents on federal lands for years, but an intrinsic flaw in the process excludes corridor establishment on private, state, and local lands. The Programmatic Environmental Impact Statement should address the establishment of contiquous corridors on a regional basis taking into account lands that are not federally managed. City and county governments must be involved and become firm stakeholders in this process.

All too often energy interests are directed and counseled to utilize established corridors and then

realize the fate that eventually the corridor does not 1 2 exist when federal land interfaces with state, local, 3 and private urban development. That has always been an issue. A perfect example right here locally is the 4 canyon utility corridor that comes over the mountain 14:37:27 5 6 near Bountiful and Centerville. It's a designated 7 corridor over Forest Service lands. You get to the bottom of the mountain and there is no corridor. 8 So 9 that's an example of the type of things we need to look 14:37:39 10 at in this process because a 50-mile corridor doesn't get you from Wyoming to California. 11 12 We will be filing formal written comments prior to November 28th. I appreciate the opportunity. 13 14 I am also taking the opportunity to speak in Las Vegas on some more site-specific issues there. 14:37:55 15 Thank you. 16 Oh, and Mr. Fisher and any other members of the DEQ are more than welcome to come look at the 17 reclamation and re-vegetation of the Kern River 18 UT0419 Pipeline. We are very proud of it. 14:38:10 20 MR. POWERS: Thank you very much. Mr. John Jurrius with the Ute Indian Tribe. 21 22 MR. JURRIUS: Good afternoon. If the panel 23 would allow me, I represent the Northern Ute Indian 24 It would be appropriate to allow our Chair to 25 open for me, if that would be acceptable to the panel? 14:38:34
